### Flash Streamer

Using an electron beam to trigger chemical reactions with air particles, the Flash Streamer breaks down allergens such as pollen and fungal allergens, and removes unpleasant odours to provide better, cleaner air.

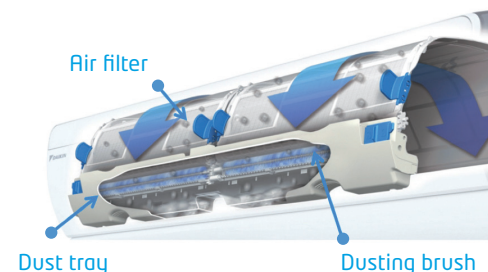

### Titanium apatite deionising filter

Breaks down odours and ensures a constant supply of clean air.

### Self-cleaning filter

The air filter removes dust particles from the air, while the built-in brush automatically cleans the filter at regular intervals to ensure a constant supply of clean air.

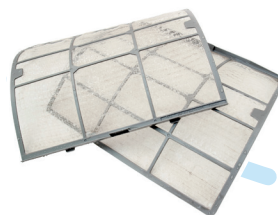

Dust tray

Dusting brush

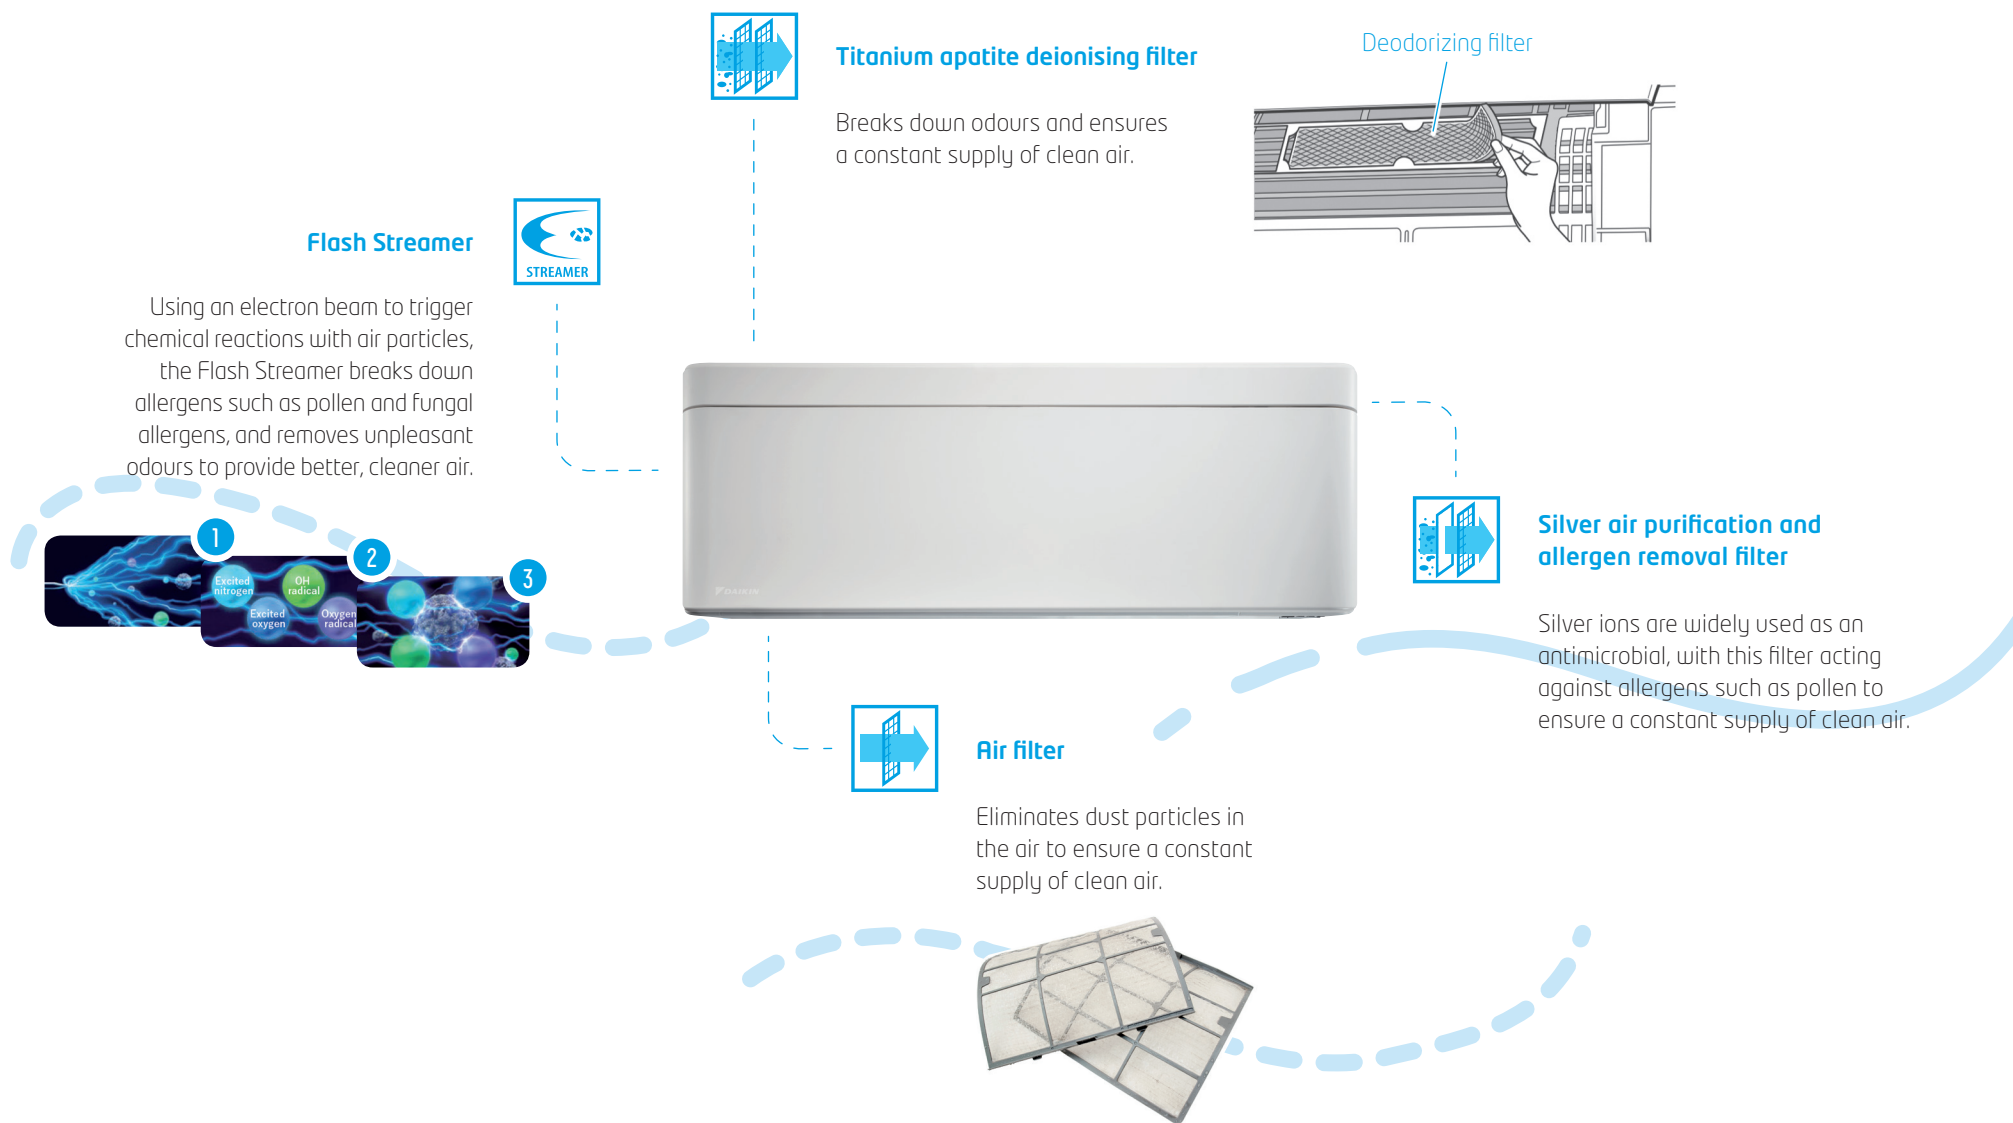

### Air filter

Eliminates dust particles in the air to ensure a constant supply of clean air.

## Titanium apatite deionising filter

Breaks down odours and ensures a constant supply of clean air.

## Flash Streamer

Using an electron beam to trigger chemical reactions with air particles, the Flash Streamer breaks down allergens such as pollen and fungal allergens, and removes unpleasant odours to provide better, cleaner air.

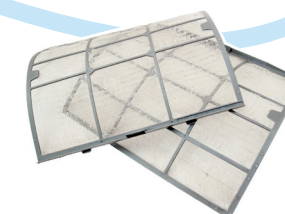

## Silver air purification and allergen removal filter

Silver ions are widely used as an antimicrobial, with this filter acting against allergens such as pollen to ensure a constant supply of clean air.

## Air filter

Eliminates dust particles in the air to ensure a constant supply of clean air.

## Titanium apatite deionising filter

Breaks down odours and ensures a constant supply of clean air.

## Catechine filter

This kind of filter incorporate catechine, a natural antibacterial and antiviral substance that increases system's effectiveness.
