

Notes

- 1 All wiring, components and materials to be procured on-site must comply with the applicable legislation.
- 2 Use copper conductors only
- 3 For more details, refer to the wiring diagram of the unit.
- 4 Install a circuit breaker for safety.
- 5 All field wiring and components must be provided by an authorised electrician.
- 6 Unit has to be grounded in compliance with the applicable legislation.
- 7 The wiring shown is a general points-of-connection guide and is not intended to include all details for a specific installation.
- 8 Make sure to install the switch and the fuse to the power line of each equipment.
- 9 Install a main switch to control the multiple power sources that the various components of the system make use of.
- 10 For detailed control box side connection, see control box manual and wiring diagram.
- 11 For detailed pipe and wire connections and limitations, refer to the manual of control box and the connected outdoor unit.
