Notes

- To be able to use these options, it is required that control box *KCB*{C} is part of the system.
 - Domestic hot water
 - Backup heater
 - External room thermostat/heat pump convactor
 - Option box
- To be able to use these options, it is required that option box *K2CB*{C} is part of the system.
 - Control external heat source (bivalent operation).
 - Output remote ON/OFF signal space heating/cooling
 - Remote alarm output
 - External indoor thermostat
- The simplified user interface (*KRUCBS) can only be used in combination with a main user interface (*KRUCBL1~7).
- *KRTETS can only be used in combination with *KRTR1
- The valve kit is mandatory if a heat pump convactor is installed on a reversible model (not mandatory for heating only models).
- Only 1 of these options can be installed per indoor unit.
- The combination possibilities depend on the power supply type.
- If condensation is expected, the installation of valve kit EKMBHP1 is required.
- Unified model, the actual backup heater capacity depends on the actual internal upwiring.

(10) Only 1 sensor connectable: indoor or outdoor

(11) Data cable for connection with PC.

(12) Mandatory option

Remark

Other combinations than mentioned in this combination table are prohibited.
