

# EKHBRD-ADY17

## Notes

1. The ESP curves are the maximum ESP curves, with and without domestic hot water tank installed on top of the indoor unit (pump rpm: 4000).  
The pump of the indoor unit is inverter-controlled and functions to have a fixed  $\Delta T$  between the return water temperature and the leaving water temperature.
2. In case of installing a domestic hot water tank, there is an additional pressure drop over the 3-way valve (delivered as an accessory with the tank).

ESP: External Static Pressure

Flow: water flow through the unit

## Warning

1. Selecting a flow outside the operating area can damage the unit or cause the unit to malfunction.  
See also the minimum and maximum allowed water flow range in the technical specifications.
2. Water quality must be according to EU directive 98/83 EC.
