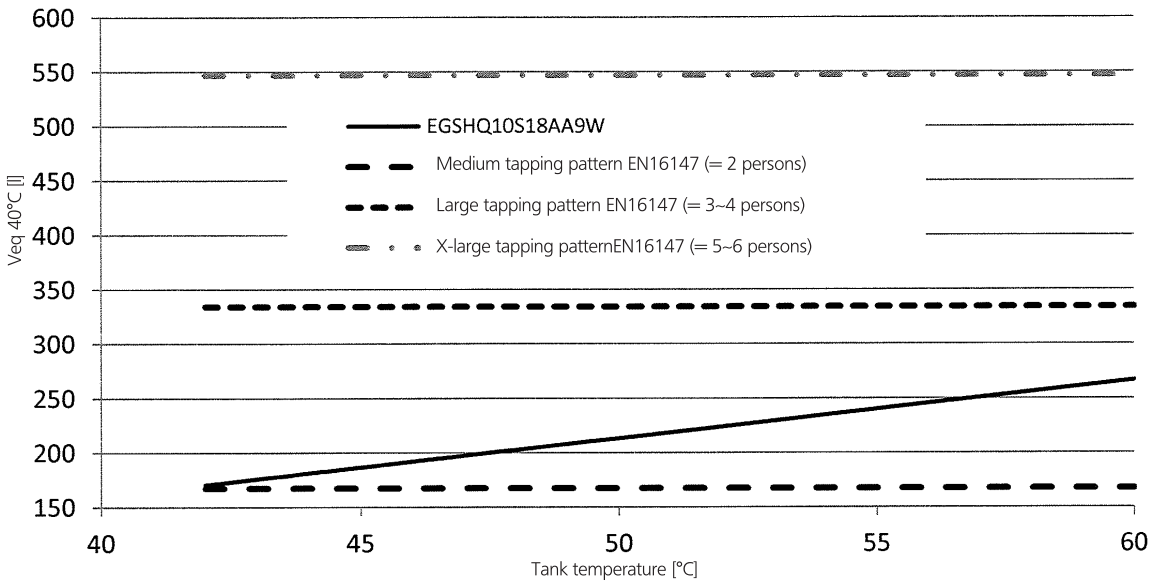
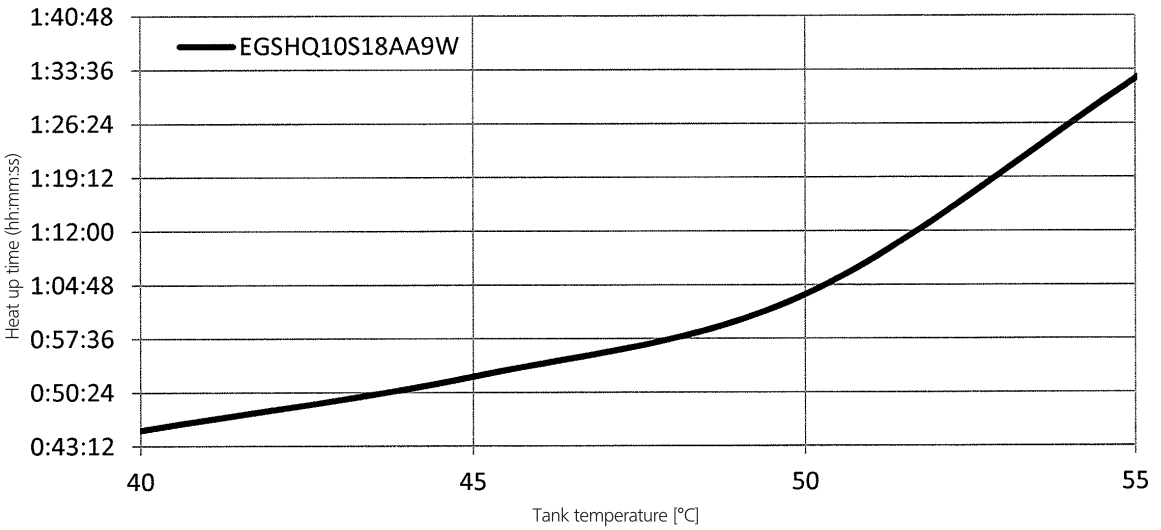
Selection guidance of domestic hot water tank volume

Veq 40°C = amount of water that can be tapped with a temperature of 40°C when the hot water tank is heated till a certain temperature with a cold water inlet temperature of 10°C.



If a higher daily Veq 40°C is required then additional heat up cycles are required within 24 hours. Refer to the operation manual for more information.

Heat up times



Valid for brine entering temperature 0°C
