ERHQ-BW17

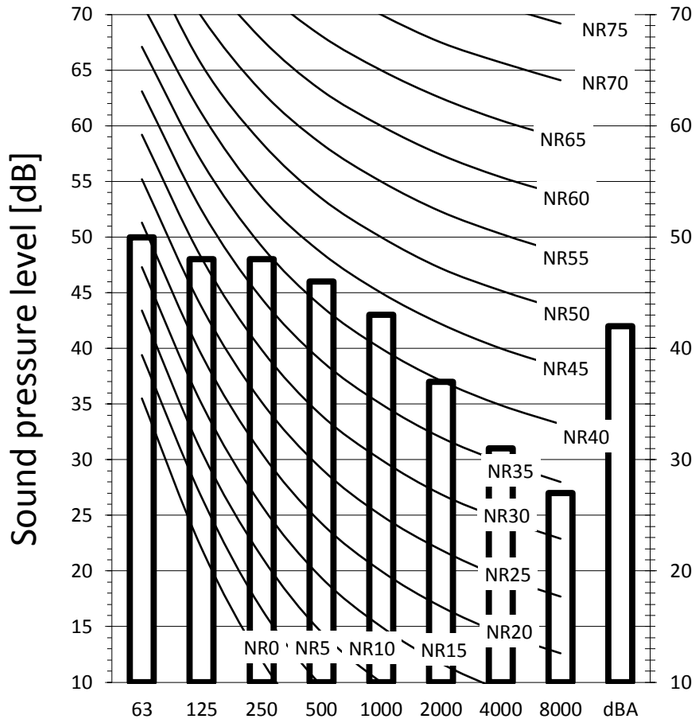

Heating

*R(H/L)Q011*W1

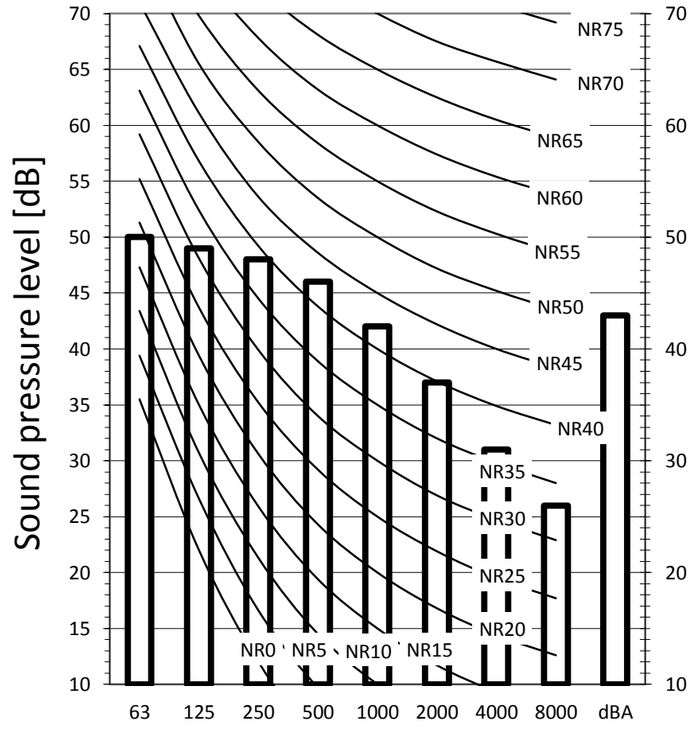

Octave band centre frequency [Hz]

*R(H/L)Q014*W1*

Octave band centre frequency [Hz]

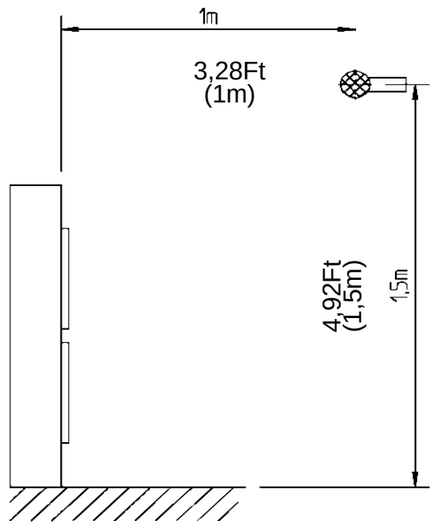

*R(H/L)Q016*W1

Octave band centre frequency [Hz]

Notes

1. Data is valid at free field condition.
   Measured in a semi-anechoic chamber
2. The data applies to level ·1· of Night Quiet mode.
3. dBA = A-weighted sound pressure level (A scale according to IEC).
4. Reference acoustic pressure 0 dB = 20 µPa
5. If the sound is measured under actual installation conditions, the measured value will be higher due to environmental noise and sound reflections.

Measuring location (discharge side)
