

EPSKS-AV3

Sound pressure [dBA]
Cooling operation
Quiet Mode
Low noise level -2-

EPSKS0(4/6/7)ARV3

Notes

1. Data is valid at free field condition.
Measured in a semi-anechoic chamber
2. Unit condition: Ta=35°C - cooling
3. Cooling -12/7 °C.
4. Data is valid at steady operation conditions resulting in maximum sound.
5. dBA = A-weighted sound pressure level (A scale according to IEC).
6. Reference acoustic pressure 0 dB = 20 µPa
7. If the sound is measured under actual installation conditions, the measured value will be higher due to environmental noise and sound reflections.

	Sound pressure [dBA]		
	1m	3m	5m
EPSKS04ARV3			
EPSKS06ARV3	35,6	26,1	21,6
EPSKS07ARV3
