Outdoor DB Temperature [°C]: Outdoor air temperature that strikes the condensing coil (dry bulb).
Indoor DB Temperature [°C]: Indoor air temperature that strikes the evaporating coil (dry bulb).

Outdoor DB Temperature [°C]: Outdoor air temperature that strikes the evaporating coil (dry bulb).
Indoor DB Temperature [°C]: Indoor air temperature that strikes the condensing coil (dry bulb).

Performances and operation guaranteed.

Operation guaranteed (COOLING OPERATION). The cooling capacity can be reduced up to 5% compared to the maximum achievable at full speed.

Performances and operation guaranteed with EC axial fans.

Operation guaranteed (HEATING OPERATION).
