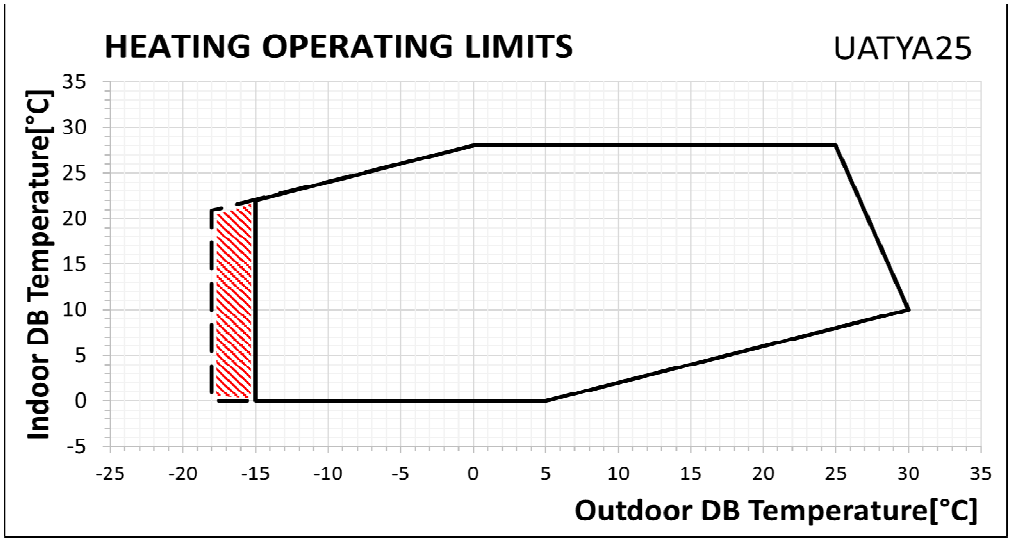
Outdoor DB Temperature [°C]: Outdoor air temperature that strikes the condensing coil (dry bulb).
Indoor DB Temperature [°C]: Indoor air temperature that strikes the evaporating coil (dry bulb).



Outdoor DB Temperature [°C]: Outdoor air temperature that strikes the evaporating coil (dry bulb).
Indoor DB Temperature [°C]: Indoor air temperature that strikes the condensing coil (dry bulb).

	Performances and operation guaranteed.
	Operation guaranteed (COOLING OPERATION). The cooling capacity can be reduced up to 5% compared to the maximum achivable at full speed.
(A)	Performances and operation guaranteed with EC axial fans.
	Operation guaranteed (HEATING OPERATION).
