

## NOTES

- These figures assume the following operating conditions:  
Indoor and outdoor units:
  - Equivalent pipe length: 7.5m
  - Level difference: 0m
- When outdoor temperature is more than 46°C, cooling capacity may be small for protection control of unit.
- Depending on operation and installation conditions, the indoor unit can change over to freeze-up operation (indoor de-icing).  
To reduce the freeze-up operation (indoor de-icing) frequency it is recommended to install the outdoor unit in a location not exposed to wind.
