

## Notes:

- 1 All wiring, components and materials to be produced on the site must comply with the applicable local and national codes.
- 2 Use copper conductors only.
- 3 For more details, see wiring diagram.
- 4 Install a circuit breaker for safety.
- 5 All field wiring and components must be provided by a licensed electrician.
- 6 The unit shall be grounded in compliance with the applicable local and national codes.
- 7 Wiring shown are general points-of-connection guides only and are not intended for or to include all details for a specific installation.
- 8 Be sure to install the switch and the fuse to the power line of each equipment.
- 9 Install the main switch that can interrupt all power sources in an integrated manner because this system consists of the equipment utilizing the multiple power sources.
- 10 For detailed control box side connection, see control box manual and wiring diagram.
- 11 For detailed pipe connections and limitations, see manuals.
- 12 Connection appliance can be standard indoor unit or free choice of air handling unit.
