

Notes

- The fan curves are determined with $\cdot 1/3 \cdot$ of the ESP on the outdoor side (-EA & OA-), and $\cdot 2/3 \cdot$ of the ESP on the indoor side (-RA & SA-).
 EA = Exhaust air
 OA = Outdoor air
 RA = Room air
 SA = Supply air
- Measured according to JIS B 8628 - 2003.

Legend

- L1 = Low speed lower limit
- L8 = Low speed factory setting
- L15 = Low speed upper limit
- H1 = High speed lower limit
- H8 = High speed factory setting
- H15 = High speed upper limit
- UH1 = Ultra-high speed lower limit
- UH8 = Ultra-high speed factory setting
- UH15 = Ultra-high speed upper limit

- Ultra-high speed
- - - High speed
- · - Low speed
