ERA-AYF

Notes

- 1. These figures assume the following operation conditions
 - Indoor and outdoor units Equivalent piping length: ·5·m Level difference: ·0·m
- 2. Depending on operation and installation conditions, the indoor unit can change over to freeze-up operation (indoor de-icing).
- 3. To reduce the freeze-up operation (indoor de-icing) frequency, it is recommended to install the outdoor unit in a location not exposed to wind.
- 4. Operation range is valid in case direct expansion indoor units are used. If other indoor units are used, refer to the documentation of the respective indoor units.
- 5. // Unit operation is possible, but no guaranteed capacity
- 6. If the unit is selected to operate at ambient temperatures <-5°C for 5 days or more, with relative humidity levels >95%, it is recommended to apply a Daikin range specifically designed for such application. For more information, contact your dealer.
