

REFRIGERANT REUSE CERTIFICATE

SUPPORTING THE CIRCULAR ECONOMY

This store is equipped with heat pumps reusing refrigerant from refurbished Action stores, avoiding the production of new refrigerant and consumption of natural resources.

Daikin Europe N.V. confirms that it has recovered and reclaimed a quantity of R-410A refrigerant from refurbished Action stores that equals the quantity of refrigerant used as factory charge for the heat pumps* in this store.

Thereby this store 100% supports the circular economy of refrigerants, further reducing its environmental impact.

Frans Hoorelbeke
Chairman, Member of the Board
Daikin Europe N.V.

Toshitaka Tsubouchi
Vice president sales
Daikin Europe N.V.

* An exact list of heat pump serial numbers covered and amount of refrigerant reused can be found in store report.
